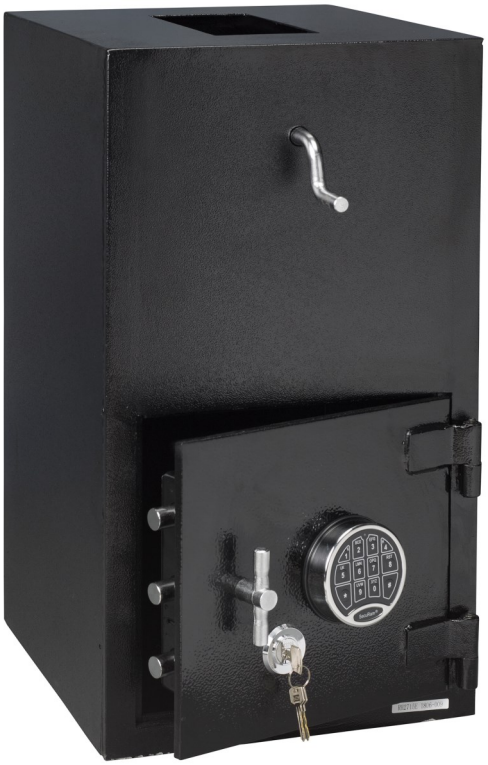
SINCE 1905

Wilson Safe Company

Service You Deserve, Tradition You Trust

RH2715E Depository Safe



The rotary hopper depository safe offers a quick and easy way to make larger drops. The hopper has a rotating tube within a tube design that makes “fishing” difficult. After placing your deposit in the hopper, with one turn of the handle the contents drop behind the secure locked safe door. Staff are able to make deposits directly into the main compartment without opening the door of the safe and gaining access to its contents. Periodically securing your cash and valuable assets over the course of the business day helps to reduce the threat of internal and external theft. All these features, coupled with outstanding customer service and 24/7/365 live technical support, give you the peace of mind your assets are secure.

Specifications:
