The mailbox drop depository safe offers a quick and easy way to instantly secure cash. This safe allows staff to make deposits directly into the top compartment without opening the main door of the safe and gaining access to its contents. Extra cash tills or change funds can be kept in the lower compartment for easy access as required through the business day. With individual locks for each compartment, you can limit access to those who need it. Securing your cash and valuable assets in separate areas helps to reduce the threat of internal and external theft. All these features, coupled with outstanding customer service and 24/7/365 live technical support, give you the peace of mind your assets are secure.
