- The optional light feature illuminates the exterior face and deposit compartment. Depository sign not illuminated.
- Convenient forms compartment available on FC-N905 model.

OPTIONS

- Steel Shroud Available
- Matching Depository Keys to Other Heads
- Chute Closer Device

VSI - U.L. NIGHT DEPOSITORY HEAD

VSI's manually operated night depository heads provide ease of operation for after-hour deposits of cash and currency when properly installed with an acceptable chest and alarm protection. The various models meet or exceed Underwriters Laboratory's stringent standards for safety and protection listed under the U.L. 771 standard and can be used for drive-up or walk-up applications.

The four different models available accommodate new construction as well as units installed in existing structures. The models include: FC-N905, FC-N911, FC-N913, and FC-N901.

The exterior depository face is finished in high-grade stainless steel providing a modern design. The optional light feature illuminates the exterior face and deposit compartment for easy access during night hours. Depository sign not illuminated.

Features include a counter-weighted access door that opens and closes easily. Additionally, the ADA-compliant door handle is designed and positioned for easy access by all customers.

A special hopper design ensures an unrestricted path for deposits into the receiving chest when the

unit is installed for drive-up use. The hopper opening is secured by a heavy duty tumbler U.L.-listed lock. The lock allows customers to securely deposit bags up to 11 1/2" W x 8 1/2" D x 5 1/4" H. The key is not removable until the hopper is closed and locked. Furthermore, the hopper opens approximately 11 1/2" W x 5/8" H to accept envelope deposits without the need of a key.

Service to the units is made simple and can be performed easily by a single technician without the need for lifting equipment.
